Circa Squares™

"Pick Your Own Squares" Prop

updated 2/2/20 8:39 AM

Pick your own squares! Choose the exact combination of last digits of each team's score at the end of the 1st, 2nd, and 3rd Quarter, and at the end of the game (see reverse for 3rd Quarter and Final Score boards).

EXAMPLE: If the score is Chiefs 14, Bucs 10 when the 2nd Quarter ends, #6641 would be the 2nd Quarter winner.

Circa Squares™

"Pick Your Own Squares" FAQ

Are these squares the same as the squares I've seen at football watch parties?

Our "Pick Your Own Squares" prop is based on the same concept as traditional squares. The combination of the last digits of each team's score at the end of each quarter* determines which bettors win. A few things make our squares different:

- Bettors get to choose their own squares and last digit combinations.
- Bettors can get as many squares as they like.
- Bettors can choose different squares for each quarter*.
- Each square within each quarter* has its own odds. Last digit combinations that are less likely to occur pay out more than those that are more likely to occur.

Can I get a particular number combination for all four quarters* of the game?

Yes, simply find the combination you want on all four boards and place a bet on each. For example if you like the combination of CHIEFS last digit 4 and BUCS last digit 9 you would place bets on #6550, #6650, #6750, and #6850.

How much does a square cost?

The minimum bet is \$1 which gets you one square on one of the quarter* boards. If you want a particular number combination on all four boards that would cost you \$4.

How much do I win if one of my squares wins?

That depends on how much you bet on that square and on the square's odds. The numbers with the plus sign (+) attached are the odds which tell you how much you would win on a \$100 bet. You don't have to bet \$100, just scale the number up or down as you like. For example a square with +7500 odds would pay \$7,500 on a \$100 bet and it would pay \$75 on a \$1 bet. Everyone's bets are independent. There's no split pool like traditional squares.

Are the odds on the sheet the final odds?

The odds on the sheet are the odds as of the time the sheet was printed. The odds on some squares may be adjusted as bets come in. But once you place a bet on a square, your odds are locked in. The odds on your ticket are the odds you'll get paid if you win.

*We are using the term "quarter" above to mean each of the four game scores that will determine the Pick Your Own Square winners. The first three are at the end of the 1st Quarter, at the end of the 2nd Quarter, and at the end of the 3rd Quarter. The fourth game score is the Final Score which may not necessarily be at the end of the 4th Quarter since the game could go to overtime.
